- Comprehensive Site, Building and Code Assessments
- Construction Administration
- Current Firm Registrations active in DE, MA, MD, NJ, NY and PA - availability for all 50 states

Renovation

Historic Restoration

New Construction

DIFFERENTIATORS

Technology

We walk our clients through their proposed projects with computer animations and VR (Virtual Reality).

We also invested in **3-D Laser Scanning Technology** that affords Murray Associates to shorten project schedules while maintaining extremely high level of accuracy.

Low Change Orders

Our change orders on renovation construction are typically within 2-3% AND new construction are typically within .5-1% - **both are well below the national averages which saves our clients' money.**

Common Sense Sustainable Design

All our designs strive to reduce the amount of energy and other resources utilized on a daily basis while positively impacting the lives of all occupants. A sustainable design will minimize overall environmental impacts, protect occupants safety, and optimize whole building efficiency on a life-cycle basis.

- **We have designed a ONE-OF-A-KIND BUILDING for PHFA (PA Housing Finance Agency) that retrofits a historic building and newly constructs an 8-story tower designed to LEED Platinum and Passive House Standards.**

Client-Centric Communication

Focus on project goals, budgets, schedules, and phased implementation will be client based from the programming phase through closeout.

In-depth Principal Involvement

Our "hands-on approach" with our principals' involvement throughout all projects that enhances our client-centric communication. **This constant oversight provides an additional layer of quality assurance.**

1 Interior Designer

2 Project Mgr./Construction Admin.

4 REVIT Technicians

3 Administrative Support

PAST PERFORMANCE

PA Housing Finance Agency (PHFA) LEED Platinum and Passive House Expansion, Harrisburg, PA. PHFA needed to expand their state headquarters in an urban landlocked city block. The adjacent Historic Hickok Mansion was retrofitted and a new 8-story tower footprint utilized a small parking lot. The tower addition is constructed of steel, glass, precast concrete, brick, stone, and crowned with 77 photovoltaic panels and a green roof, providing visual interest at both the street and upper levels.

The historic 1904 residence's historic exterior was preserved and a thermal barrier wall system was introduced inside the original facade, upgrading its energy performance. **The project has won The 2019 Preservation Award from the Historic Harrisburg Association; The 2020 PA Governors Environmental Excellence Award; and The 2020 PA AIA COTE Award of Excellence awarded to the only project demonstrating excellence across all ten measures of the AIA Framework of Design Excellence.**

Other Government Clients:

- New Cumberland Army Depot, Fairview, PA
- United States Bureau of Tobacco, Fire Arms & Explosives, Harrisburg, PA
- United States Census Bureau, Harrisburg, PA
- United States Secret Service, Harrisburg, PA
- United States Social Security Administration, Harrisburg, PA
- Department of Labor Federal Credit Union, Washington DC
- Pennsylvania Department of Corrections, Camp Hill
- Pennsylvania Department of Transportation, multiple Districts across the state
- Pennsylvania Historical and Museum Commission, Hbg
- Pennsylvania State Police, Harrisburg & Hershey
- Williamsport Regional Municipal Airport, Williamsport, PA

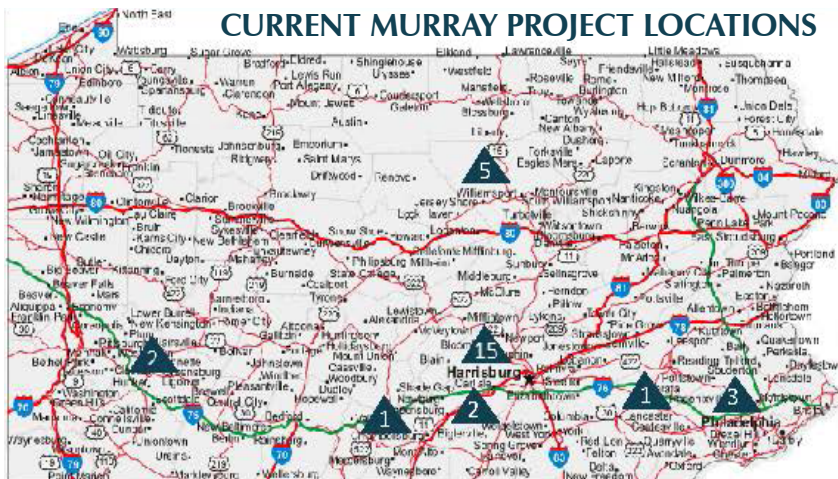

Special Events Forum, Building 14, NAVFAC - NSA, Mechanicsburg, PA
The facility is a high-end use area for the Base complex events including training, fairs and military change of commands. Areas renovated included the lobby, coat room, forum seating area, stage area, audio booth, the Display Area and existing rest rooms/janitor closet. Construction Cost: \$900,000.00.

This was a design-Build project with Kunj Construction (8a/MBE/DBE Certified Firm) based in Mechanicsville, VA and Northvale NJ

General Mail Facility, United States Postal Service (USPS), Harrisburg, PA
Located on 60-acres, this is one of the largest mail sorting facilities in the USPS system.

The facility has a two-story mechanized workroom plus a mezzanine. Mail is moved vertically by conveyors and on a driver-less tractor ramp. The facility includes a retail post office, personnel support facilities, general offices, 137 dock spaces and 950 vehicle parking spaces. Construction Cost: \$60,000,000.00.
